Artelligent Group Since its establishment, by relying on its technical knowledge and organized collection, respecting the professional principles of work, as well as respecting the rights of customers and providing appropriate after-sales services, it has been able to take a significant share of the market of this profession.

license plate recognition software provides simple and accessible information analysis tools to managers and analysts to analyze their data in the shortest possible time, and by creating a common display environment between the goals and actual performance of the organization, it leads to better decision making And it becomes more efficient

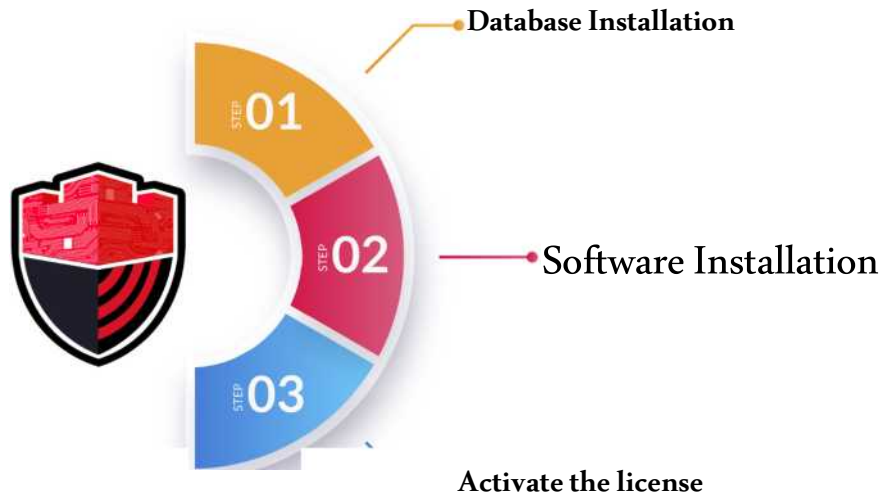

Our programming team With long-term experience, it has provided systems independent of different license plate recognition software. Software systems help you manage your business in the best way under your supervision and control

Software features

Simple installation with just three clicks

Pasargad
Artelligent Group

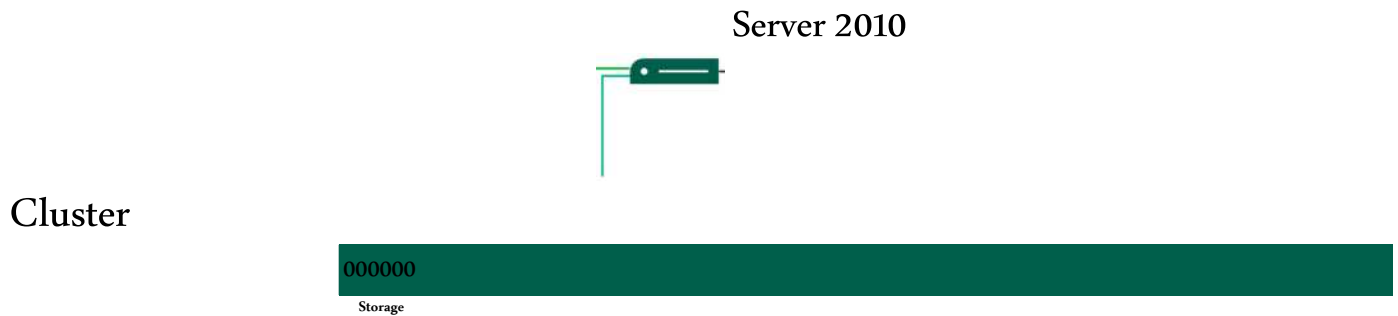

Ability to connect to all standard network cameras under RTSP code

<https://ati-rayan.com>

The ability to install on Windows 10, 11 and Windows Server 2016-2022 and the ability to provide as Server and client and a special solution for optimal use of hardware resources in organizations

Failover cluster

Identifying the stream of reliable camera brands

Defining the time of non-repetitive license plate reading

Overwrite saved photos by setting the duration of the overwrite cycle

The ability to read license plates in different light and location conditions License plate reading from recorded videos

Automatic reconnection of software to cameras in case of disconnection

Reading license plates at high speed

Reading distorted license plates

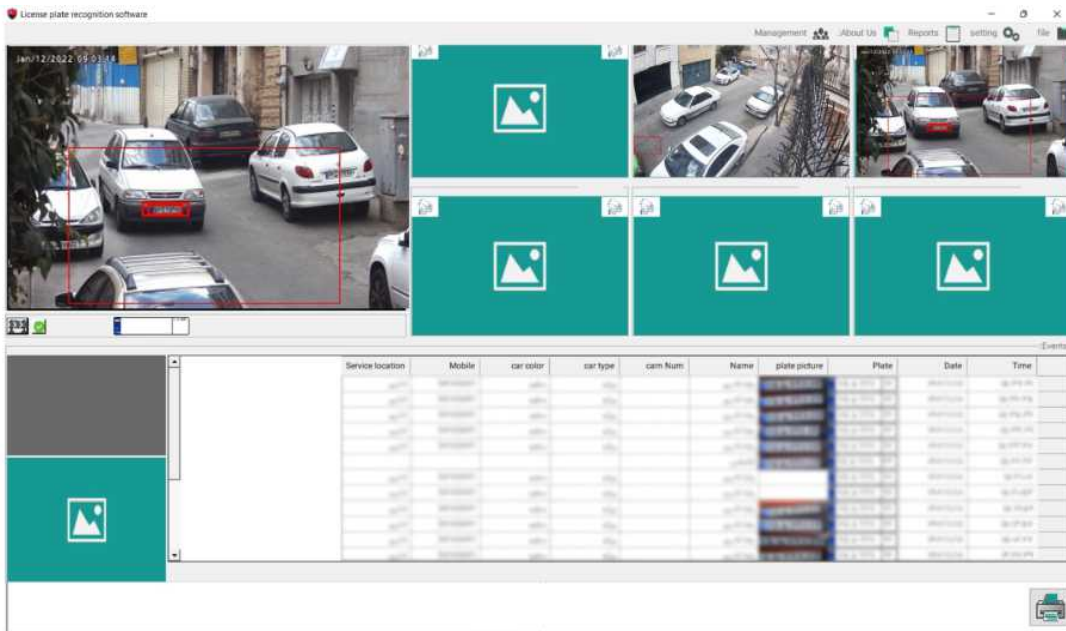

Very simple to use

Providing license plate reading with manual operation and automatic mode Display up to 20 license plates viewed on the main screen at the same time Determining a part of the image to read license plates from that part

Connecting to the arm barrier and electric door through the network, as well as sending the command manually through Software or automatically
Manual correction of wrongly registered license plates easily

Software features

Comprehensive and complete reporting system

Excel and pdf reporting from one or all cameras using different parameters

Ability to search based on city, persons, license plates and location in different time periods

Ability to search based on a part of the license plate

Presenting report based on imported and exported cars, known as the u report

Report based on unknown license plate

The screenshot displays the 'Reports' software interface. At the top, there are search filters for 'Part of the plate', 'From' (1403/03/09), 'To' (1403/03/08), 'Plate' (All), 'Car' (All), 'Person' (All), 'Province' (All), and 'Rank'. Below these are 'Search' buttons and a checkbox for 'Search in unknown license plates'. The main area is split into two panes. The left pane, titled 'Traffic log', contains a table with columns: Location, Camera Number, Date, Plate, Time, and ID. The table is filled with green rows. A tooltip above the table says 'Double click on the columns to define people'. The right pane, titled 'Vehicle information', shows a camera feed of a street with several cars. Below the feed are 'Save' and 'Print' buttons. At the bottom of the right pane, there are input fields for 'Plate', 'Driver', 'Weight', and 'Car type and color'. At the bottom left of the interface are 'Exit' and 'Excel' buttons.

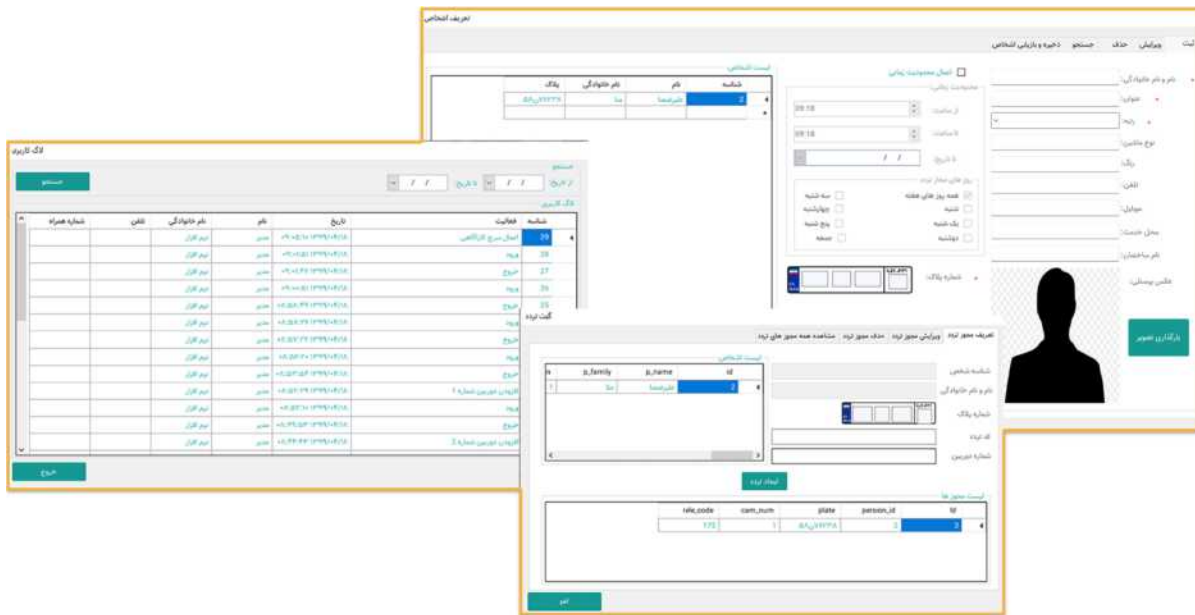

Having a comprehensive and complete user events logs

Definition of traffic permit along with scheduling

Registration of a person with personal photo information, building name, phone, mobile phone, car

color, car type and identity information

The ability to import and export the definition list of persons Ability to search in the definition of persons

The ability to create access levels for users

Software backup capability

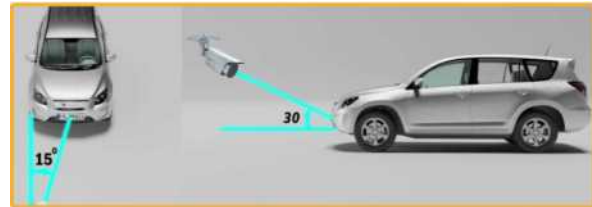

Software features

Equipped with artificial intelligence system for automatic update and training and better license plate reading in the direction of angles Standard

The lowest consumption of system resources

Powerful and optimal performance with reliable brand cameras

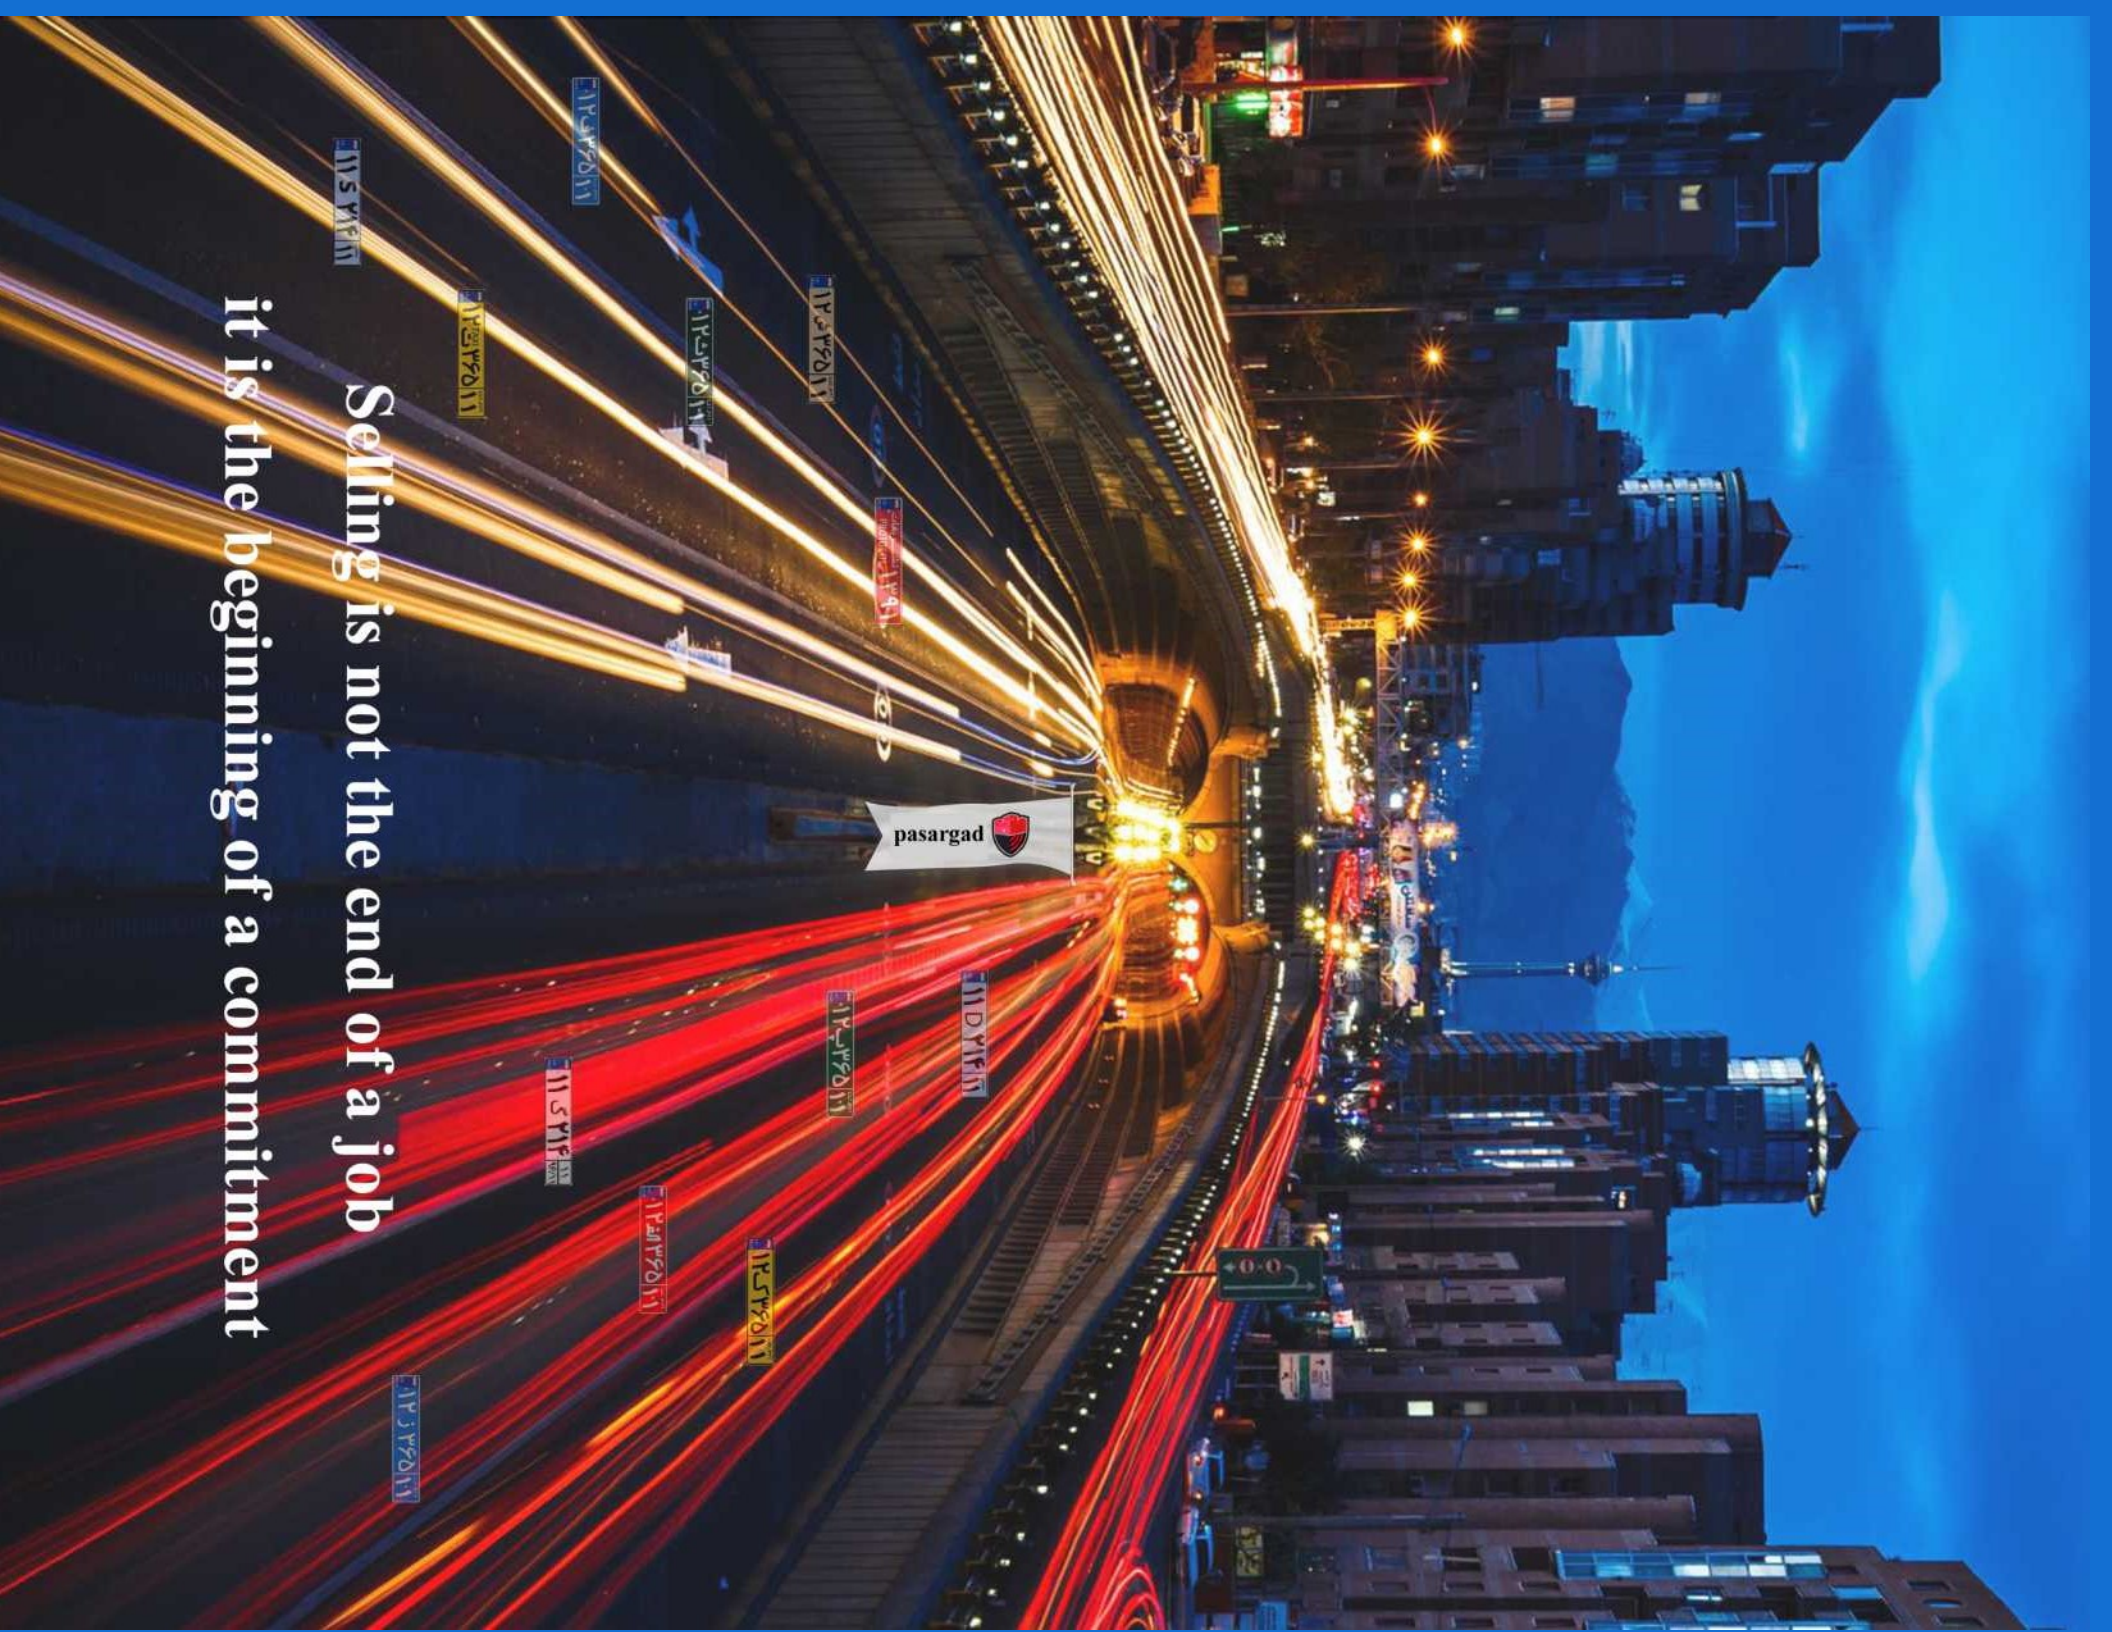

Identification and registration of license plates of border areas and customs Software update by the support team Can provide in different levels with different capabilities

- ✓ The version that can be used in parking such as hotel and store parking
- ✓ Organizations version
- ✓ The version that is used on roads
- ✓ The Version used for specific organizations
- ✓ The version that is used in border areas and customs
